## MATERIAL HANDLING SOLUTIONS

DEFINING RUGGED

GAMBER® JOHNSON
Very Well Connected™

Gamber-Johnson is a leading manufacturer of rugged mounting solutions for your equipment. We offer a variety of mounts that can be configured for your specific make and model. Gamber-Johnson offers an assortment of products designed to hold fixed vehicle computers, tablets and keyboards. Whether you want to mount your device horizontally on the overhead guard leg, vertically off the overhead guard or anywhere else, Gamber-Johnson has a solution that will fit your needs.

Gamber-Johnson tests all of their products to ensure they function flawlessly in the most rugged environments. Our mounts are durable enough to hold displays weighing over 20 lbs. horizontally, off the overhead guard leg, without a problem. We offer a rugged solution to ensure you have a safe and ergonomic solution.

## Clam Shells (Small and Large Backer Plate)

The Single Clam Shell features VESA 75mm, Gamber-Johnson 2x4, NEC or AMPS hole patterns to allow you to easily attach a device, dock, cradle or interface plate. The ability to adjust the angle of the device up or down helps to create a more ergonomic solution and allows you to determine the optimal viewing position for your device.

The Dual Clam Shell mount offers improved features and benefits to the Single Clam Shell by increasing the tilt, swivel and rotation options. With the second clam shell, you can not only tilt the device up or down, but you can angle the screen of the device slightly back towards the overhead guard leg for better visibility.

The width of the overhead guard leg will determine what size backer plate to use. The small backer plate is recommended for overhead guard leg width ranging from 1.5" to 2.5". The larger backer plate is recommended for overhead guard leg width ranging from 2.5" to 5.0".

**Dual Clam with Large Backer Plate**

## Overhead Guard Mounts

The Overhead Guard Mount attaches directly to the overhead guard, allowing you to vertically mount your device. The mounts come in four options:

- **Short Overhead Guard Single Clam Shell** – used when mounting the device closer to the ceiling of the overhead guard is required

- **Short Overhead Guard Dual Clam Shell** – also used when a low-profile mount is required; this mount has a second clam shell that provides additional articulation

- **Overhead Guard Clam Shell** – used when you want the device to extend further down off the overhead guard for easier viewing, overhead guard leg extends 8" down from the top

The Clam Shell has a VESA 75mm, Gamber-Johnson 2x4, NEC or AMPS hole patterns on it. All the overhead guard mounts can be rotated 360°, giving the user the option to position the device that fits their needs.

## Dual Clam Shells with 3" Arm (Small and Large Backer Plate)

This mount features a 3" Arm between the two Clam Shells, which helps to bring the device closer to the driver. The arm adds an additional swivel point, allowing you to position the device at the optimal ergonomic position.

## Horizontal Extension Bracket

The Horizontal Extension Bracket gives the user over 15" of horizontal space from the inside of the overhead guard arm to mount a display or device. The Horizontal Extension Bracket allows the system to be configured for optimal user ergonomic configurations. The Horizontal Extension Bracket is a superb solution for mounting heavier computers and keyboards. The Horizontal Extension Bracket can be used in conjunction with the Clam Shell with Small Plate or Dual Clam Shell with Small Plate Mounts.

## Roll Formed Bracket

The Roll Formed Bracket is used to mount a device to a truck that has a roll formed overhead guard leg. The Roll Formed Bracket can be used with the Clam Shells (Small or Large), Dual Clam Shells (Small or Large), Dual Clam Shell with 3" Arm (Small or Large) or the Horizontal Extension Bracket.

## 2", 2.5" or 3" Diameter Tube Clamp

The Tube Clamp is used to mount a device to a truck that has a tube style overhead guard leg. The Tube Clamp can be used with the Clam Shells (Small or Large), Dual Clam Shells (Small or Large), Dual Clam Shell with 3" Arm (Small or Large) or the Horizontal Extension Bracket. The Tube Clamp allows the Clam Shell to mount in a horizontal and vertical orientation.

# Zebra ET50/55 8.3" or 10.1" Enterprise Docking Stations

Gamber-Johnson rugged vehicle docking stations for the Zebra ET50/55 are designed to increase workplace productivity and protect the tablet in rugged environments such as material handling and warehousing.

**Features**

- Designed and tested for MIL-STD 810G specifications
- Docking stations are compatible with Zebra Enterprise tablets with the "rugged frame" option
- Docking station accommodates the expansion back of the ET50/55 to easily add accessories (scanner/ hand strap and optional battery bay or hand strap and optional battery bay)
- Integrated front camera on the ET50/55 is accessible when the tablet is in the docking station.
- Compatible with either Windows or Android operation systems on the ET50/55
- Dual latch/locks provide added stability and docking connectivity
- Downward-facing I/O ports; cable strain relief system for easy cable management
- POGO pin docking connector for positive docking connectivity
- Guide pins prevent damage to the docking connector when docking the tablet
- VESA 75mm mounting pattern
- Steel and Composite design for reduced overall weight
- Rugged construction for long-term durability
- 3 year limited warranty

# Accessories

**Handheld Barcode Scanner/Mobile Computer Mount**
Fits most handheld barcode scanners

**Keyboard Articulating Arm with Mini Clevis**
For use with any Clam Shell and Keyboard attaches directly to the arm

**Printer Mounts**
Easily mount printers to the Overhead Guard Leg

**Lockable Quick Release Universal Keyboard Tray**
Use with the Keyboard Articulating Arm

**Lind Power Supply 20-60 VDC** or 12-32 VDC
For use with Zebra ET50/55, cradles or docking stations

**Universal Tablet Keyboard Mount**
Combine a tablet docking station and keyboard

**Quick Release Mount**
Allows computer or tablets mounted to any Clam Shell to be easily removed from the vehicle without tools

**Overhead Guard Extension Sleeve**
Allows the Overhead Guard Mount to be lowered an additional 4.0"
