

Inventory

Overview

The **IntelliTrack Inventory software** is designed to be used with portable or fixed station barcode readers to provide a complete turnkey solution to manage your inventory. (If you have only purchased the Inventory module, you will need to purchase your hardware separately.) Inventory functions are available to handle everything from routine physical inventories to managing a perpetual inventory. IntelliTrack modules are written in Microsoft® Access XP and include the source code should you want to customize the Inventory system for your specific needs.

The IntelliTrack Inventory portable software enables the portable barcode reader to collect inventory data automatically. It provides for the collection and storage of user ID, inventory, locations, and quantities, all with the accuracy, speed, and simplicity of barcodes.

The IntelliTrack software includes a ready to run, PC compatible SQL Server to manage all of your inventory data. IntelliTrack includes standard reports, queries, and barcode label printing capabilities.

IntelliTrack - Move Item

User ID: Marilyn
 Job/Ref#:
 Item#: 1TOPGUN

From
 Site: Paris
 Location: 1B22
 Lot:
 Exp Date: 1/1/1920

To
 Site: Paris
 Location: 1C33
 Quantity at Location: 392
 Quantity to Move: 2

Use the Move Item# form to move individual inventory items from one location to another. Use Move Item# when reorganizing a warehouse or inventory.

The History function keeps a running history of all transactions performed within the Inventory database. This feature is useful in identifying inventory trends and for auditing purposes.
